

BiermannPartners AG

Our core competence lies in the worldwide identification, direct address and evaluation of executives and specialists in banking. Thanks to the very close contact to executives and strategic decision-makers, we generate unknown possibilities and ideas consecutively. During the selection process of the best associates possible, we set ourselves apart from our contestants with new ways and define ourselves through confidence, reliability, teamwork and flexibility. We are executive search consultants – but we even more see ourselves as “information managers”.

Head Quantitative Investment Management, Zürich

Company

Our Client is a global asset and wealth manager with assets under management of over 80 billion CHF. With more than 25 branch offices worldwide it has a strong global presence. For its investment center, we are looking for a dedicated Head Quantitative Investment Management to be based in greater Zurich area.

Tasks

As Head Quantitative Investment Management you will manage a small but very professional team of Quantitative Portfolio Managers including the responsibility for existing Dynamic Shield Products on Fixed Income, Equities and Multi Asset Class. You continuously optimize the respective quantitative investment strategies as well as generate and implement new ideas. Furthermore, you present the Dynamic Shield Products to existing and potential new clients as representative of the quantitative investment management and maintain an open communication. Aside the responsibility for these products your team provides quantitative support to the other investment management teams in terms of quantitative analysis, screening tools, back testing for investment strategies and various individual evaluations.

Required Profile

As an experienced Portfolio Manager with at least 10 years within investment management you have a proven track record of an absolute return product either fixed income or multi asset class. With your outgoing personality and professional appearance you understand to represent your department as well as products to internal and external clients. In previous roles with personal management responsibility you learned to promote a team approach (own team as well as crossfunctionally) that ensures a professional and efficient environment. With a university degree in physics, mathematics, engineering, econometrics or equivalent skills you have a solid background in quantitative finance, programming and database knowhow. You are familiar with statistical analysis tools such as matlab, C#, C++, VB(A) or from the like as well as Bloomberg and databank systems (SQL). Technical skills include an excellent oral and written communication in English and German.

Contact

If this job description suits you, we are looking forward to get to know you personally. You can send your application dossier to bettina.schoch@biermann-partners.ch. For any further questions, please do not hesitate contacting us on +41 44 213 62 23.
