

BiermannPartners AG

Our core competence lies in the worldwide identification, direct address and evaluation of executives and specialists in banking. Thanks to the very close contact to executives and strategic decision-makers, we generate unknown possibilities and ideas consecutively. During the selection process of the best associates possible, we set ourselves apart from our contestants with new ways and define ourselves through confidence, reliability, teamwork and flexibility. We are executive search consultants – but we even more see ourselves as “information managers”.

Quantitative Analyst, Zurich

Company

Our Client is a global investment boutique focused exclusively on Sustainability Investing, who is looking for a dedicated Quantitative Analyst for its international research team based in Zürich. The firm’s offering comprises asset management, indexes and cleantech private equity. It has partnered with Dow Jones Indexes and STOXX Ltd. in the publication and development of the Dow Jones Sustainability Indexes (DJSI) and has compiled one of the world's largest sustainability databases.

Tasks

The main mission for the tendered position would be to conduct quantitative analysis of the clients proprietary data stretching over 1500 global companies and ten years. To achieve this, tasks like managing projects on data and empirical analysis within the investment office as well as constructing quantitative models for investment processes have to be accomplished. The responsibility includes further the management of projects involving external academic partners.

Required Profile

The position requires a university degree in physics, mathematics, engineering, econometrics or equivalent skills. An experience of at least three years in a non-academic environment and focused on data and empirical analysis is asked preferably in the financial industry. Technical skills include an excellent oral and written communication in English. A higher focus lies on personal skills. You should be familiar with statistical analysis tools such as matlab, eviews or from the like. Furthermore the ability of phrasing and presentation skills is needed.
